

OCO Order Example:

OCO order includes Limit Order and Stop Loss Order at the same time. OCO order can help you to achieve your profit target, at the same time, reduce the risk of loss due to opposite market trend. **If the limit order of OCO order is executed, the stop loss order will be cancelled. Conversely, if the stop loss order is executed, the limit order will be cancelled.**

Supposed we have opened a position by selling a HSI futures contract at 20060. We will close the position at the target level 20000 to ensure 60 points profit. At the same time, we want to limit our loss for 60 points at the level 2120. If the market price rises to 2120, the stop loss order will be triggered and trailing 10 points. **And the limit order at 20000 will be cancelled by the system.**

Steps for placing an OCO order:

The screenshot shows a software window titled "Enter Order - HSIQ9(HSI 2009-08)". The window has a yellow background and a blue border. At the top left, there is a small icon and the title. The main area contains several input fields and controls:
