		9450	311			25511	25508	25462	8	HSI29																	
										25200																	
										25400																	
										25600																	
										25800																	
										26000																	
										26200																	
										26400																	
										26600																	

Choose "HKIF" in the dropdown box in the upper left corner in the "Option Master" window, → choose either "HSI" or "HHI" in another dropdown box to its right, and the Weekly Index Options will be shown in the Date filter.

The date format of Weekly Index Options is longer than Monthly Index Options as the expiry day is included apart from year and month.

### Examples:

Weekly Index Options: If the expiry is 23 Dec 2019, then it is 2019/12/23

Monthly Index Options: If the expiry is Dec 2019, then it is 2019/12

After choosing the strike price of Weekly Index Options, a code will be automatically generated next to the "Quote Request" box, and a product name followed by expiry will be shown in the box next to it.

### Example

For HSI26000L9W23, HSI indicates Hang Seng Index, 26000 is the strike price, L9 indicates Dec 2019, and W23 indicates the expiry date is 23<sup>rd</sup> day of the aforesaid month.

---

## Market Price

Id	Name	State	B Qty	Bid	Ask	A Qty	Last/ EP	L Qty	Chg	Chg %
HSI26000L9W23	HSI 2019-12 26000 Call	open								
HSI26000L9	HSI 2019-12 26000 Call	open	2	823	831	7	829/851	8	-56	-6.33%
HSI26000X9W23	HSI 2019-12 26000 Put	open								
HSI26000X9	HSI 2019-12 26000 Put	open	10	1298	1305	8	1301/1301	3	-23	-1.74%

Clients can search the Weekly Index Options of HSI and HHI on the “Market” page of the “Market Price” window.

Weekly Index Options will be sorted out with expiry dates in chronological order, and relevant Weekly Index Options with the same strike price can be found by clicking “call” or “put” to expand the directory tree in the left pane.

As illustrated in the above diagram, the difference between the codes of Weekly Index Options and that of the Monthly Index Options is clearly shown in the right pane – the codes of Weekly Index Options are longer.
